PERSONAL PROJECTS

Indian Railway Tracking Web Application (05/2019 - 10/2020)

- Successfully developed a web application that allows users to track trains in real-time across India.
- Utilized Indian Railway API to retrieve and display real-time train information, which was well received by the users.
- Implemented various features such as Train status, live station, PNR status, seat availability, fare enquiry, and more, which received positive feedback from users.

ACHIEVEMENTS

Successfully integrated various third-party services to improve the functionality of the application

Acted as a technical lead and mentored junior developers, which resulted in the successful delivery of multiple projects.
